Joseph Clark - President
CreeLED Inc.
4001 E Hwy 54, Suite 2000
Durham, NC 27709 USA

Dear Joseph,

This letter serves to confirm that Current Lighting Solutions, LLC. (hereafter "Current") has executed a patent license agreement with CreeLED Inc. (hereafter "CreeLED") with respect to Current's patent rights related to KSF (also called PFS) red phosphor and that the patent license is in good standing as of today's date.

Specifically, Current has granted CreeLED a limited, nonexclusive and world-wide license under U.S. Patent Nos. 7,497,973; 7,847,309; 7,358,542; 7,648,649; 9,680,067; 7,453,195, and any foreign counterparts, divisionals, continuations, continuations-in-part, reissues, and reexaminations thereof. The license is limited to the manufacture, sale, and offering for sale of light-emitting diode (LED) packages containing POTASSIUM FLUORIDE SILICON (KSF/PFS PHOSPHOR) specifically and only for applications in lamps and lighting fixtures that directly or indirectly illuminate any object, area or space. The license excludes any use of the LED packages in products whose primary purpose is information displays utilizing LCD Backlights and other emissive pixel display technology.

Sincerely,

William E. Cohen, Ph.D.
VP & GM – Current Chemicals
